

How to: Adding an Image to Patient Chart with NG Mobile

Search for Patient:

- Search for your patient from any page or access a patient chart from your schedule
- Select your patient once located

Confirm Correct Encounter:

- Verify that the correct encounter is selected at the top of the screen
- If the incorrect encounter is selected, you may change it or create a new encounter:
 - Click on the encounter section noted on the screenshot to the left
 - Click +Create New Encounter option to create encounter for the current date and time or select an previous encounter

Initiate Photo:

- Click the camera icon from the bottom task bar
- Select Take Photo

How to: Adding an Image to Patient Chart with NG Mobile

Take Photo:

- Take Photo of area
- Annotate or draw on the image as necessary using the annotation features in the top right hand corner of the phone screen

Name and Send Photo to EHR:

- Select Use Photo on bottom right corner to then save to the chart named based on your naming convention
 - TSI Healthcare recommends to add the date at the end of the image name
- Select Send to send the image to the patient's EHR chart

NOTE: For privacy and data security reasons, it is not possible to upload a photo to NG Mobile that is already saved on your mobile device, nor is it possible to save a photo taken with NG Mobile to your device locally.
