**NextGen Mobile Patient Chart Details:**

Patient Alerts: Patient Alerts will appear here if the patient has EHR chart alerts in NextGen

Demographics: Expanding this will provide patient phone number, physical address, etc.
Medications: Review active medications for a patient. Providers with prescribing rights may use the "new medication" link to e-prescribe using NG Mobile. NOTE: E-Rx of controlled substances is *not* available using NG Mobile.
Mobile Charge Entry: Not available at basic tier of NextGen.
Problems: Review a list of all documented problems in the patient chart.
Past Medical Surgical History: Review patient's surgical/medical history as documented in patient chart.
Last HPI: Review previous HPI entries and notes.
Lab Results: Review recent patient lab results.
Vitals: Last sets of vital signs documented in NextGen.

Take Picture and Attach to Chart: Will take picture and attach to encounter that appears at top of screen. If there is not an encounter, a new EHR encounter will be created for the image.

Messaging: You are able to message NG Mobile users. You are also able to create group messaging.

Mobile Dictation and Diagnosis Entry: Not available at basic tier of NextGen Mobile
